OUR CHRONIC CONDITION MANAGEMENT SERVICES

Tria Health is a health benefit offered through self-insured employers for individuals with chronic conditions. Our solution personalizes care for employees and simplifies benefits for self-insured employers with a goal of improving health and reducing health care costs.

Tria Health utilizes pharmacists to understand why individuals don't achieve their clinical goals. Through a comprehensive medication and lifestyle review, Tria's pharmacists improve health literacy, close gaps in care and optimize pharmacy utilization. The patient's care plan is always shared with their physician and is considered the basis for future consultations.

Additional patient resources are available based on the individual's needs, including remote monitoring, weight loss management, and personalized medicine (DNA testing).

BOOK OF BUSINESS HIGHLIGHTS

- 1.3 A1C reduction¹ for members with uncontrolled diabetes.
- 42% of cuff users experience significant cardiovascular disease risk reduction.¹
- 3:1 overall average ROI with 1.2:1 achieved solely from Rx savings.
- \$2,142 average savings per engaged member per year.
